Kiwanis Installs 1941 Officers

At a gala dinner-dance party, held at the Palos Verdes Country club, City Attorney John E. McCall was installed, as the 16th president of the Torrance Kiwanis club (founded in 1925) Monday evening. Eighty-seven Kiwanians, their wives and guests were present for the brief installation ceremonies which followed the dinner and preceded dancing to Henry Martz' orchestra.

President McCall and other officers were installed by Dr. Joe Trainor, Los Angeles physician and surgeon who is lieutenant-governor of the California-Nevada Kiwanis district. The other club officials for the new term who were inducted by Dr. Trainor during the evening were Gaston Arco, first vice-president; Jack Barrington, second vice-president; Dr. Don Wilmoth, secretary; Howard Locke, treasurer; and George Moore and J. B. Scott, directors. Other officers who were unable to be present at the festivities included Henry Grubb, Dr. W. I. Laughon, Jack Miller, Rev. Frank Porter and James Rahl, directors.

Caution Urged In Adoption

EVERY year there are approximately 16,000 American children placed for adoption. Which means, taking more approximate figures, about 60 homes competing for each child or 59 homes which would be open to a homeless youngster which are doomed to disappointment. Of the 16,000 children only about one-tenth are placed by recognized adoption agencies; the rest are either out-and-out bootleg affairs or in the hands of inexperienced doctors who are doing the best they can to see that homeless youngsters find the protection and love they need.

On the other side of the picture are about 1 million childless families in the United States who would like to adopt a child but are hampered by the bottleneck of social workers with more psychology than good sense who insist that mothers keep their children with them no matter how ill-equipped they may be for caring for the children. These figures have been obtained from experts by Greita Palmer who writes "What's Wrong with Adoption?" for the February issue of Cosmopolitan Magazine.

Investigating the situation which dooms 499 families to childlessness or resorting to unauthorized agencies for adoption Miss Palmer uncovered such figures as these: 300,000 children in this country living separated from their parents in paid foster homes or institutions, who are not available for adoption.

For the reason given by social workers, statisticians and would-be foster parents, Miss Palmer was told that the one fact responsible for this condition is that social workers use every inducement to prevent unmarried mothers from surrendering their children for adoption, even when the chances are that the children will have to be placed in institutions. Since three out of every four children adopted by non-relatives are born out of wedlock that makes a strong evidence of the hitch in adopting children.

The United States Children's Bureau has found that nearly half of all unmarried mothers are under twenty-one. A recent study showed that of 845 unmarried mothers, 154 were in domestic service; 94 were factory workers; 22 were still in school; 15 were salesgirls; 13 telephone operators; 7 teachers; 7 nurses; 3 actresses; 3 milliners and the occupations of 27 others were unknown. Obviously most of these girls were ill-equipped to take care of babies yet the social agencies persuade such unmarried mothers to refuse their children for adoption.
